NARCO MEDIA VISION

## Live Video Performance

From classical music to the funkiest of breakcores, passing through jazz and pop or Electro / House / D&B / Hip hop. We've had the opportunities to construct visual universes in many different contexts.

We've played internationally, in festivals, parties, fashion shows, you name it.

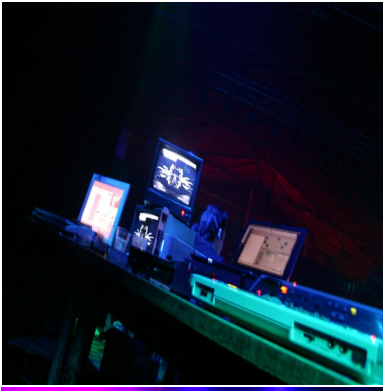

To answer to our video mixing, we've developed and produced our own hardware. We work with leading edge computers and FX modules.

### NARCO MEDIA VISION

Formed in 2004 by ZARk and 4DRH, then joined in later by Charles.

As all of the members of the Narco Media Vision team are actually musicians / producers and have a good understanding of music, we have a point of view different from a lot of Veejays who are usually only graphic artists.

he VJ should not only be considered as an artist, but also as a technician. Whichever means and techniques of projection that he chooses, he is responsible for the correct operation of his hardware, and should be apt to repair it in the shortest of delays. He should be able to adapt to different technical restrictions. He should also be able to set-up the necessary hardware to the video mixing: creation of video loops, video acquisition, video sampling, creating animations, creating fixed images, manipulating cameras real time. ## **REAL TV: on quote**

Beyond projections,  
we are able to install cameras,  
optionally with a wireless RF  
module in your event...  
(on stage-dj booth-dancefloor)  
The images can be played  
live on the screens ,and/or  
recorded to create a dvd or  
other ...
